

Report
Of
AI Web Development INTERNSHIP

Submitted
To
**School of Computer Science and Engineering
ILM University, Greater Noida, U.P.**

In partial fulfilment of the requirement of degree of
B.Tech CSE

By
Roll Number of Student: 3681
Name of Student : Naushad Ansari
Batch : 2025-29
Semester: 3rd Semester Section : 2CSE16

2026-27

1. CANDIDATE'S DECLARATION

I, Naushad Ansari, declare that this internship report presents my work and learning during the AI Web Development Internship at InAmigos Foundation. The report has been prepared from the internship documents and project evidence available to me. I have clearly distinguished completed development and research work from activities that were not completed.

The fundraising/donation activity was not completed. The internship offer letter states that fundraising was an additional responsibility and explicitly describes it as optional for achieving the completion certificate.

Name: Naushad Ansari

Roll No.: 25SCS1003003681

2. ACKNOWLEDGEMENT

I express my sincere gratitude to InAmigos Foundation for providing me the opportunity to undertake an AI Web Development Internship. I am thankful for the exposure to practical web development, website research, digital presence analysis, and project-oriented work.

I also thank IILM University, Greater Noida, for providing the academic environment in which this internship could contribute to my professional development. Finally, I appreciate everyone who supported me during the internship period.

3. INTERNSHIP COMPLETION CERTIFICATE

The following certificate records successful completion of the AI Web Development Internship at InAmigos Foundation from 09 June 2026 to 23 June 2026. It was dated 07 July 2026 and signed by Mr. Padmasri M, HR Head.

4. INTERNSHIP OFFER LETTER

The offer letter identifies the internship position as AI Web Development, with a two-week duration and generally remote working arrangements. It lists attendance/participation, timely completion of assigned tasks, and careful execution as responsibilities. It also describes fundraising as an optional activity for completion-certificate eligibility.

Offer Letter		
Dear Naushad Ansari,		
We are pleased to offer you the internship position of AI Web Development at InAmigos Foundation. Below are the details of your internship:		
Duration of Internship: Two Weeks.		
Working Hours: The working hours for this internship are flexible, allowing you to adjust according to your availability. You are expected to dedicate a reasonable amount of time to the tasks and responsibilities assigned.		
Location: This internship generally allows for remote work. However, if the role requires fieldwork, you will be expected to attend fieldwork at a site near your location.		
Responsibilities:		
• Your primary role will be related to the field of your chosen internship. All major tasks assigned to you will align with this primary focus. Additionally, you will be expected to: • Attend team meetings and actively participate in group discussions and activities. • Complete tasks assigned by your superiors in a timely and efficient manner. • Ensure that the tasks given to you are completed with the utmost care and responsibility. • As a secondary responsibility, you will contribute to the organization's fundraising efforts, as this is crucial for your stipend.		
Stipend: The stipend for this internship will be 20% of the donation raised by you during your internship period. The stipend is directly linked to the donations raised and may vary accordingly. Please note that while your main tasks will be aligned with your primary internship role, fundraising activities will be an essential part of your responsibilities to ensure the stipend. Fundraising is not a mandatory task for achieving a completion certificate. It is an optional task.		

Terms and Conditions:

By accepting this internship, you agree to the following:

- InAmigos Foundation may use any content you provide, including reports, presentations, and other work, in a professional manner.
- Maintain professionalism and respect at all times.
- Adhere to all foundation policies and procedures during the internship.
- All work created during the internship will remain the property of InAmigos Foundation, unless otherwise agreed.
- Maintain confidentiality regarding sensitive information.
- Meet deadlines and complete tasks as assigned. Failure to do so may result in termination.
- Inform the foundation if you can no longer continue the internship, providing the appropriate notice.

Confidentiality: You are required to maintain the confidentiality of any information you receive during your internship. You are not permitted to disclose any sensitive or proprietary information related to InAmigos Foundation's operations or donors.

Termination: Either party may terminate this agreement with written notice, subject to the terms agreed upon.

Kindly sign below to confirm your acceptance of this offer and send the signed copy to our foundation's email at hr@inamigosfoundation.org.in

5. PROJECT DESCRIPTION

5.1 Introductio

This internship provided practical exposure to AI Web Development through website-oriented work, research, interface design, and digital presence analysis. The central project evidence supplied for this report includes the HopeForward NGO website prototype and screenshots documenting its visual design, information architecture, donation interface, volunteer workflow, testimonials, and responsive presentation.

The internship certificate confirms successful completion of the AI Web Development Internship at InAmigos Foundation for the period 09 June 2026 to 23 June 2026.

5.2 Organization Profile

InAmigos Foundation (IAF) is presented in the supplied social-media evidence as a nonprofit organization focused on social impact. The provided LinkedIn and Facebook screenshots show the foundation's public-facing organizational presence, while the Instagram screenshot shows an active profile and community audience.

-
-
-
- Organization: InAmigos Foundation (IAF)
- Internship role: AI Web Development Intern
- Work arrangement in offer letter: generally remote, with fieldwork possible where required
- Internship period: 09 June 2026 – 23 June 2026
- Completion certificate date: 07 July 2026

5.3 Internship Responsibilities and Completion Status

Area	Status	Evidence / Note
AI Web Development / website work	Completed	HopeForward website prototype and multiple interface screens supplied as project evidence.
Website research / improvement analysis	Completed	Provided InAmigos website improvement analysis covers homepage, impact, causes, volunteers, events, blog, contact and UX.
Digital / social presence research	Completed	Provided Facebook, Instagram and LinkedIn screenshots document the organization's public presence.
Donation / fundraising activity	Not completed	The user reports this task was not done; the offer letter states fundraising was optional for completion-certificate eligibility.

The completion status above is intentionally factual: it does not claim that the donation/fundraising activity was performed. The offer letter itself states that fundraising was optional for achieving the completion certificate.

5.4 Problem Statement

The supplied website-improvement analysis identifies several digital-experience gaps in the foundation's website: the homepage lacked an immediately visible strong call to action; impact statistics lacked context and visual representation; project cards needed stronger differentiation and success stories; long text blocks reduced

scanability; volunteer and event sections had limited engagement features; the contact page was basic; and overall navigation, accessibility, mobile experience, donation visibility, trust signals, and performance could be improved.

5.5 Project Objectives

- Create a clear, modern NGO website experience that communicates purpose and impact quickly.
- Improve visual hierarchy across hero, impact, campaigns, volunteer, testimonial, and contact sections.
- Provide clear donation and volunteer conversion paths in the website interface.
- Present campaigns with funding progress, location, status, and dates.
- Design a structured volunteer application workflow with skills, availability, and motivation fields.
- Strengthen trust through impact statistics, testimonials, and organization information.
- Practice responsive and component-oriented web interface design.

5.6 Scope of the Project

The project scope covers a website prototype/visual implementation for an NGO-style organization. The supplied HopeForward evidence includes a hero section, impact statistics, campaigns, donation form, volunteer application, testimonials, calls to action, organization information, and footer navigation. The supplied screenshots also demonstrate a separate creative portfolio-style interface used as project evidence of web design and interaction work. This report does not claim that the HopeForward prototype was deployed as InAmigos Foundation's official production website. It is treated here as the supplied project/prototype evidence.

5.7 Technologies and Tools Used

-
-
-
- Web development and responsive UI implementation
- Figma / Figma Make for visual design and prototyping evidence
- Modern web interface patterns: cards, CTA sections, forms, navigation, statistics and testimonials
- Image assets and responsive layout composition
- Social platforms used as research/evidence sources: Facebook, Instagram and LinkedIn

5.8 System / Page Architecture

The supplied HopeForward website can be represented as the following information architecture:

<i>Layer</i>	<i>Function</i>
<i>Hero</i>	Mission statement, primary Donate/See Our Work actions, headline impact figures
<i>Impact</i>	Lives impacted, countries, water, education, homes, fund utilization and goal progress
<i>Campaigns</i>	Active/upcoming initiatives with funding progress, location and dates
<i>Donation</i>	One-time/monthly selection, preset/custom amount, donor information and donation CTA
<i>Volunteer</i>	Benefits, volunteer application, skills/interests, availability and motivation

<i>Testimonials</i>	Beneficiary/partner stories with category and navigation
<i>Footer</i>	Organization description, contact details, programs, get-involved links and support links

5.9 Methodology

The work followed an iterative design-and-development approach: understand the organization's communication needs; inspect existing digital presence and identified UX issues; define content sections; design the information architecture; build/assemble interface sections; review visual hierarchy and responsiveness; and document the resulting work through screenshots.

-
- Research: review organization presence and website-improvement observations.
- Planning: identify priority content, calls to action and conversion paths.
- Design: establish a visual hierarchy and reusable page patterns.
- Implementation: create website sections, cards, forms and responsive compositions.
- Review: inspect screenshots for layout consistency, readability and usability.
- Documentation: preserve screenshots and supporting internship documents.

5.10 Website Improvement Analysis

The supplied analysis rates the existing site at 7/10 overall, with Design 7/10, Content 8/10, User Experience 6.5/10, Accessibility 6/10, Trust & Credibility 8/10, and Conversion Potential 6.5/10. It recommends stronger navigation, accessibility, mobile optimization, trust signals, donation visibility and performance optimization.

-
- Homepage: stronger Donate Now and Become a Volunteer CTAs; bring impact numbers higher.
- Impact: animated counters, icons and yearly growth metrics.
- Causes: differentiated project visuals, testimonials and success stories.
- About/Volunteers: visual badges, timelines, photographs, profiles and stories.
- Events/Blog: registration, countdowns, galleries, reading time and sharing.
- Contact: map, FAQs, WhatsApp option and expected response time.
- Overall UX: sticky navigation, improved contrast/alt text, mobile optimization, faster images and lazy loading.

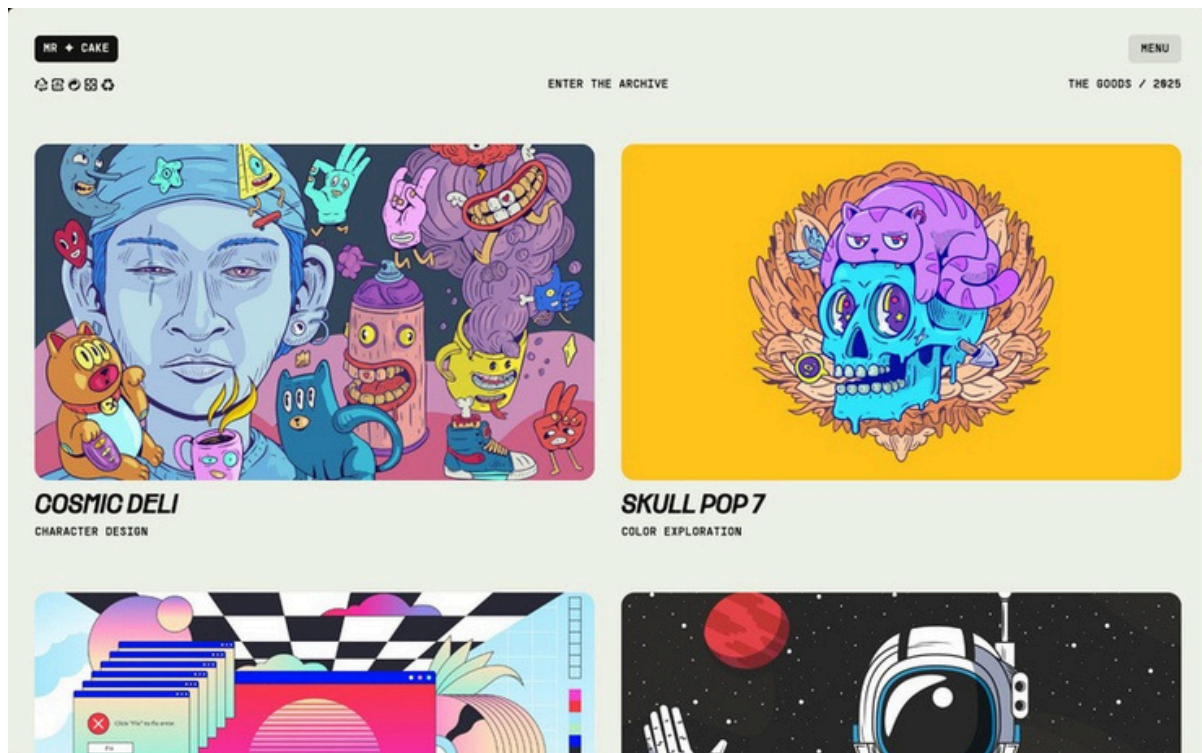

6. PROJECT EVIDENCE — WEBSITE

6.1 Portfolio/Visual Identity Landing Screen

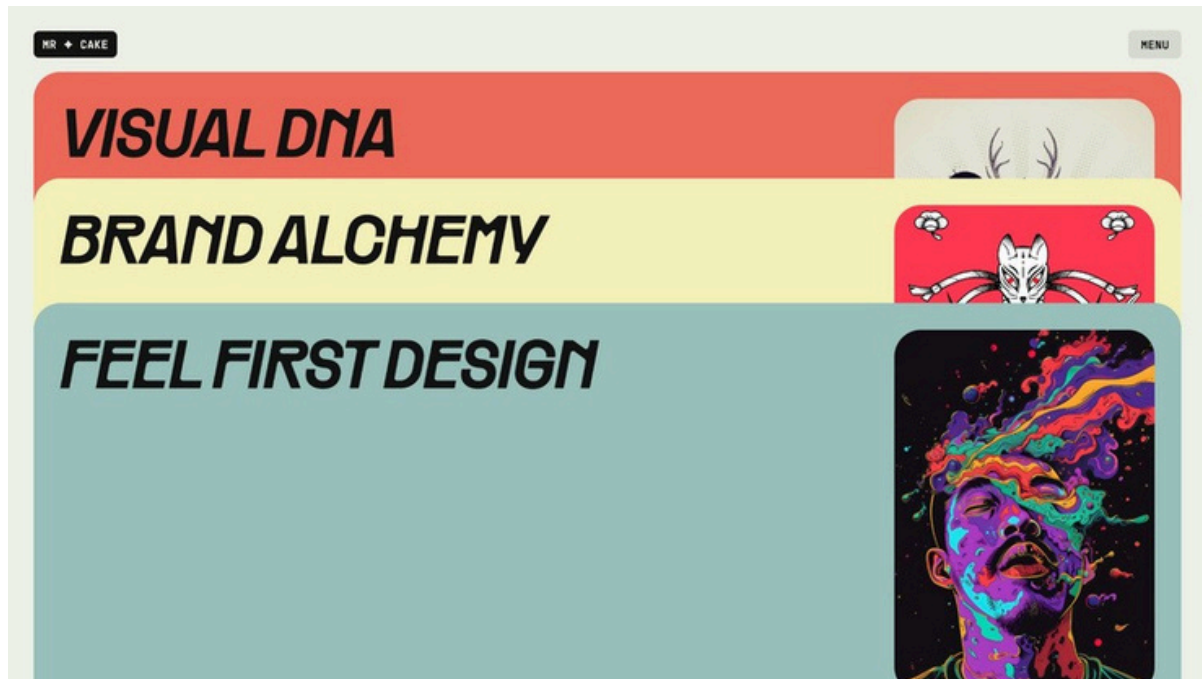

Creative landing screen demonstrating typography, image composition and portfolio identity.

6.2 Visual Archive / Project Showcase

Project archive showing multiple visual works arranged as a gallery.

6.3 Project Detail / Visual DNA

Project categories and visual identity presentation.

6.4 About / CreaCve Profile

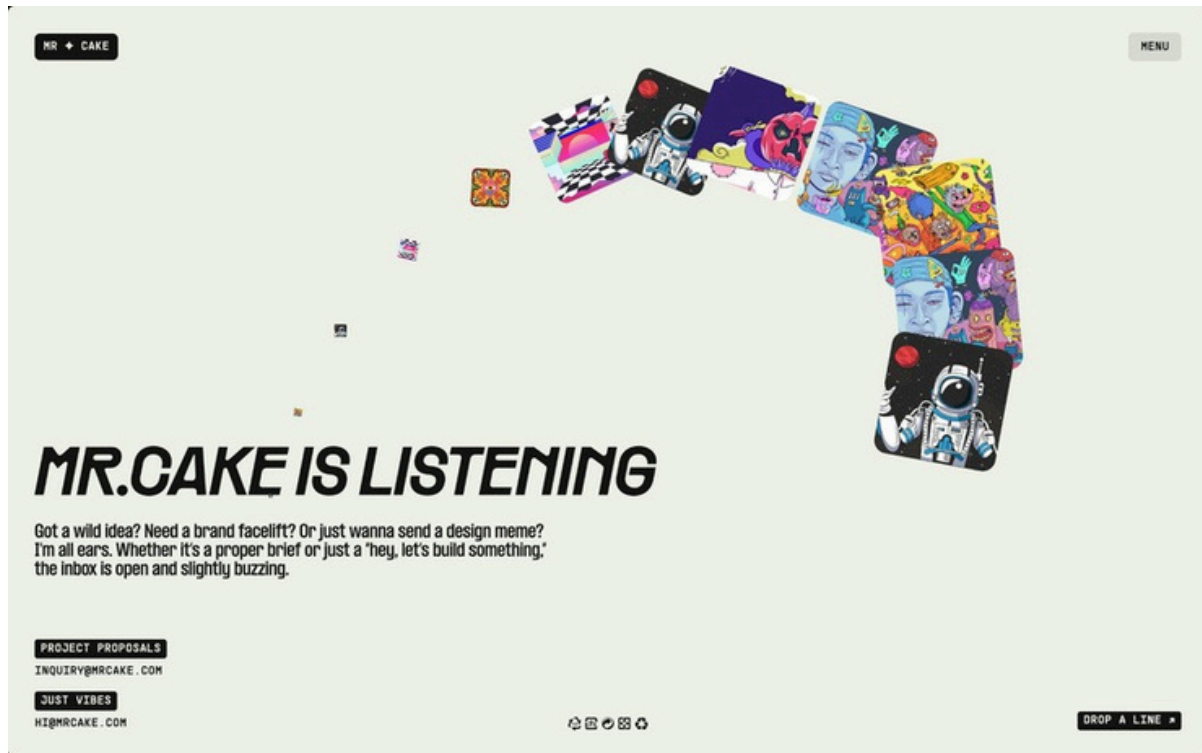

About section communicating designer profile, capabilities and personality.

6.5 Metrics / Project StaCsCcs

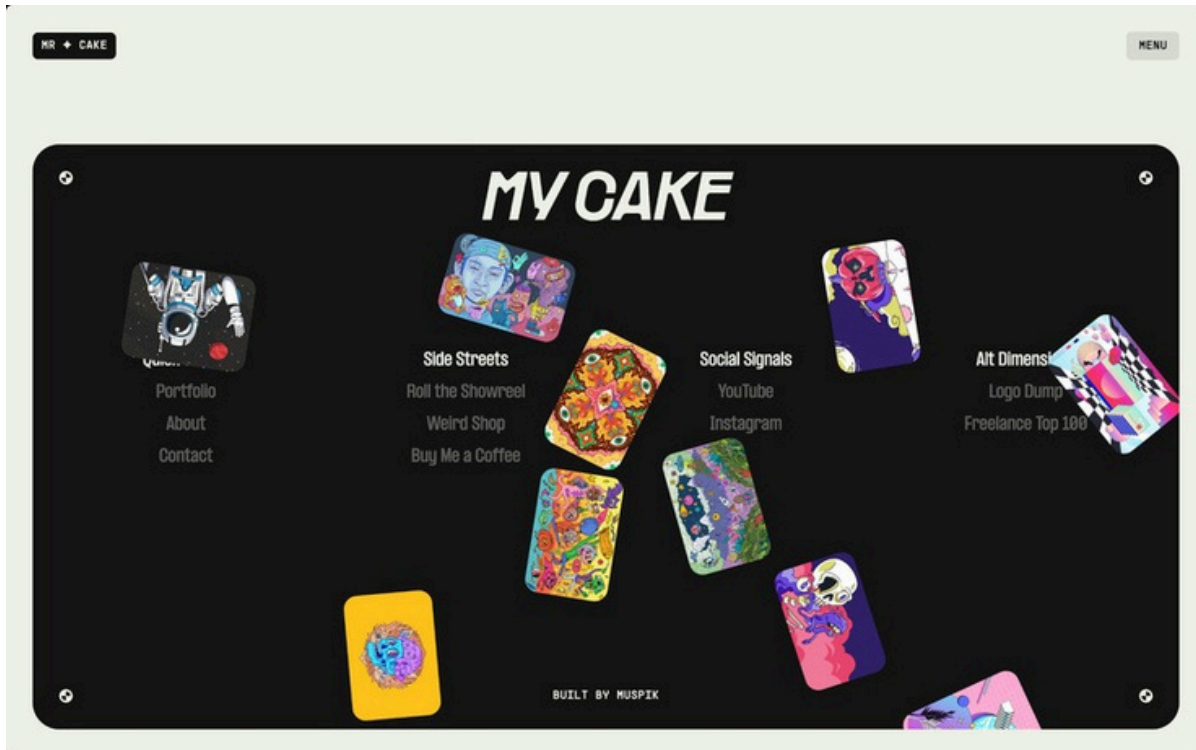

Large-format project statistics and quantified portfolio information.

6.6 Contact / Listening SecCon

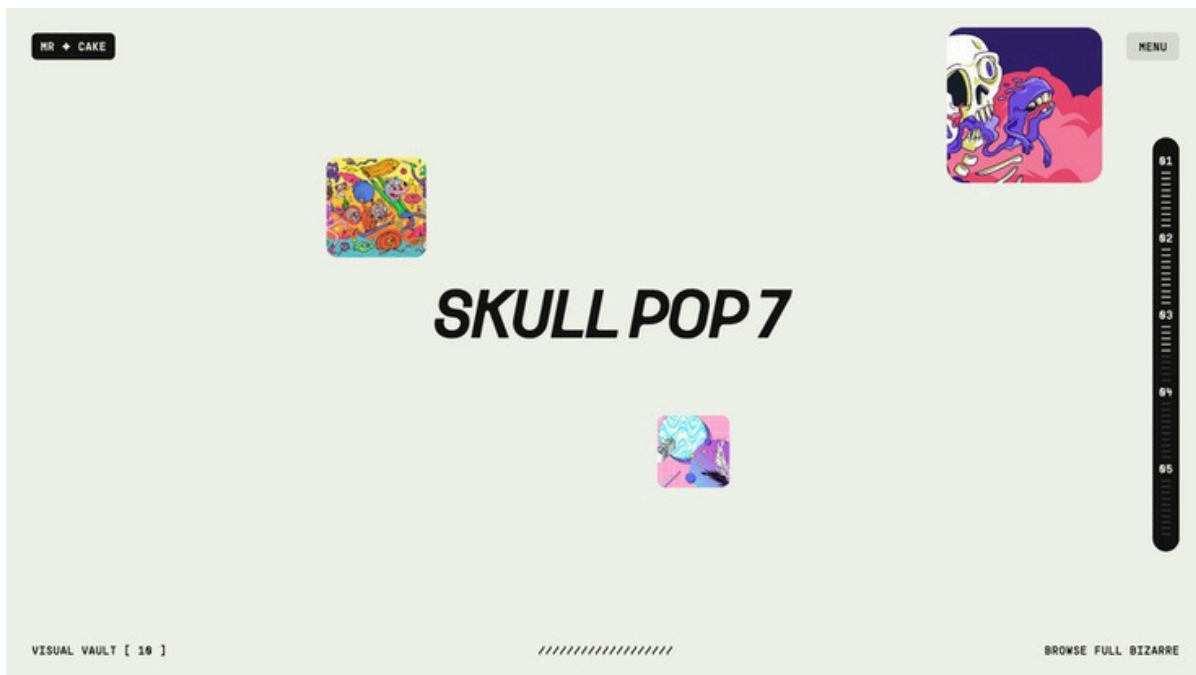

Contact-focused section with project proposals and general inquiry paths.

6.7 CreaCve Menu / NavigaCon

Expanded navigation showing quick jumps, side streets, social signals and alternate destinations.

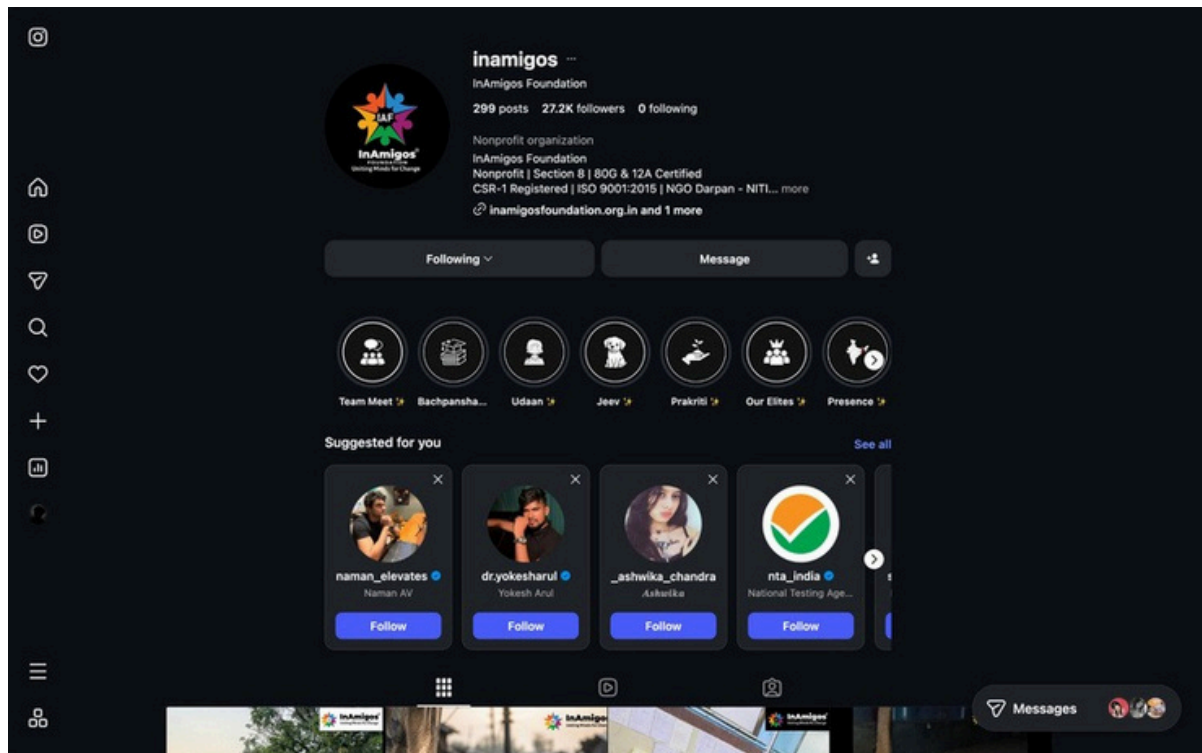

6.8 Project Archive

Archive interface featuring a highlighted project and vertical section navigation.

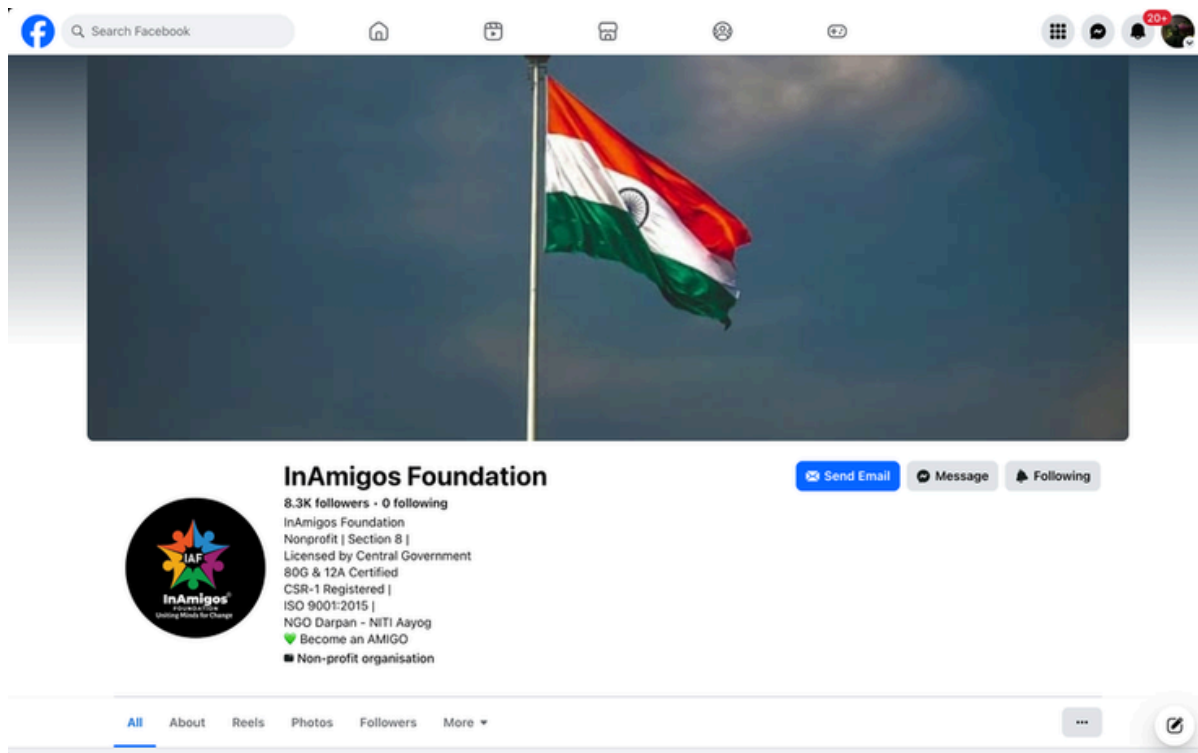

7. DIGITAL PRESENCE EVIDENCE

7.1 Instagram

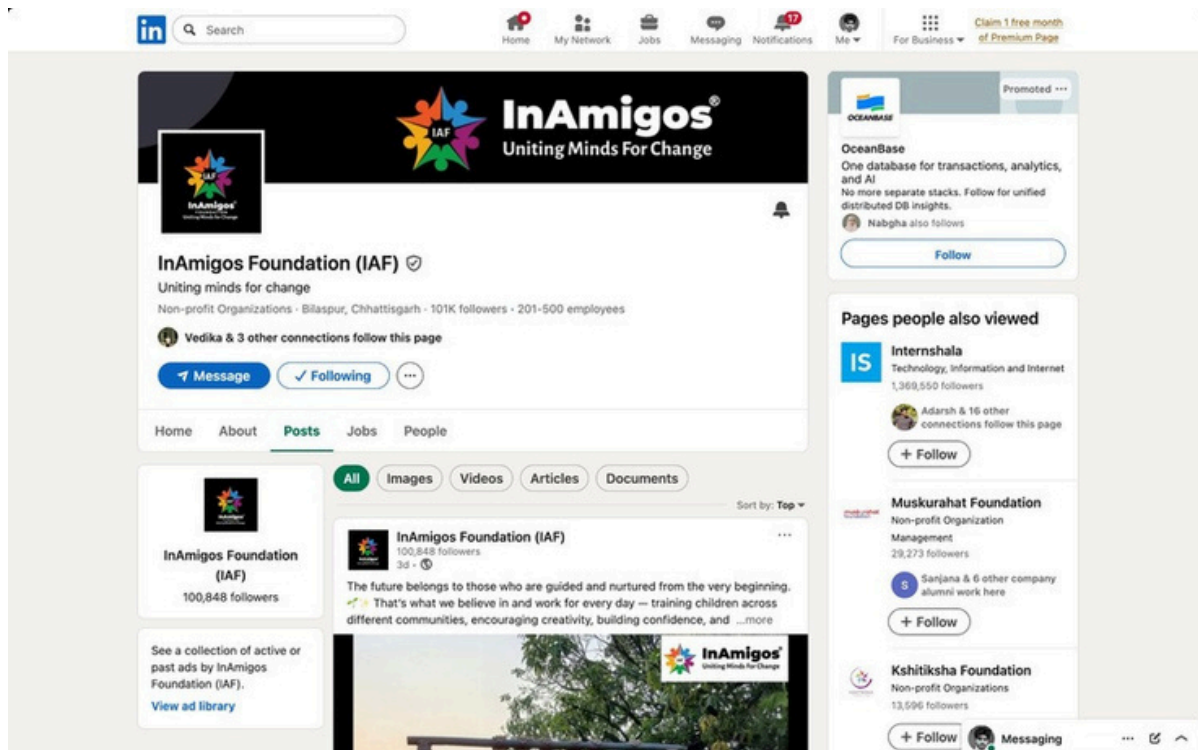

Provided screenshot of the InAmigos Foundation Instagram profile.

7.2 Facebook

Provided screenshot of the InAmigos Foundation Facebook page.

7.3 LinkedIn

8. LEARNING OUTCOMES

- Improved understanding of translating organizational goals into web content and interface structure.
- Improved ability to organize complex NGO information into scannable sections.
- Practical exposure to conversion-oriented UI patterns such as Donate and Volunteer CTAs.
- Better understanding of forms, campaign cards, testimonials, statistics and navigation systems.
- Experience documenting design and development work through screenshots and structured reporting.
- Improved awareness of UX factors including accessibility, mobile responsiveness, trust and performance.

9. CHALLENGES AND LIMITATIONS

- The internship period was short, requiring prioritization of high-value website and research tasks.
- Donation/fundraising activity was not completed; it is therefore not presented as a completed deliverable.
- The supplied evidence focuses heavily on interface and website work; no unsupported claim of production deployment is made.
- Some social-media metrics visible in screenshots are time-specific and should be treated as evidence captured at that point rather than permanent figures.

10. CONCLUSION

The AI Web Development Internship at InAmigos Foundation provided practical exposure to web-oriented problem solving, interface design, website improvement analysis, and digital presence research. The supplied project evidence demonstrates work on structured web experiences with strong visual hierarchy, clear calls to action, campaign information, donation and volunteer interfaces, testimonials, and organizational content.

The internship was formally certified as successfully completed for 09 June 2026 to 23 June 2026. The only activity identified as not completed was the donation/fundraising task; the offer letter explicitly states that fundraising was optional for completion-certificate eligibility. filecite turn2file0 turn2file2
