

INTERNSHIP REPORT

AI WEB DEVELOPMENT

InAmigos Foundation (IAF)

Naushad Ansari

IILM University, Greater Noida

26 June 2026 – 27 July 2026

Internship at a Glance

Verified from the offer letter and completion certificate

- Organization: InAmigos Foundation (IAF)
- Role: AI Web Development Intern
- Duration: 26 june 2026 - 27 july 2026
- Work arrangement: generally remote
- Completion certificate issued: 15 August 2026

Responsibilities & Completion Status

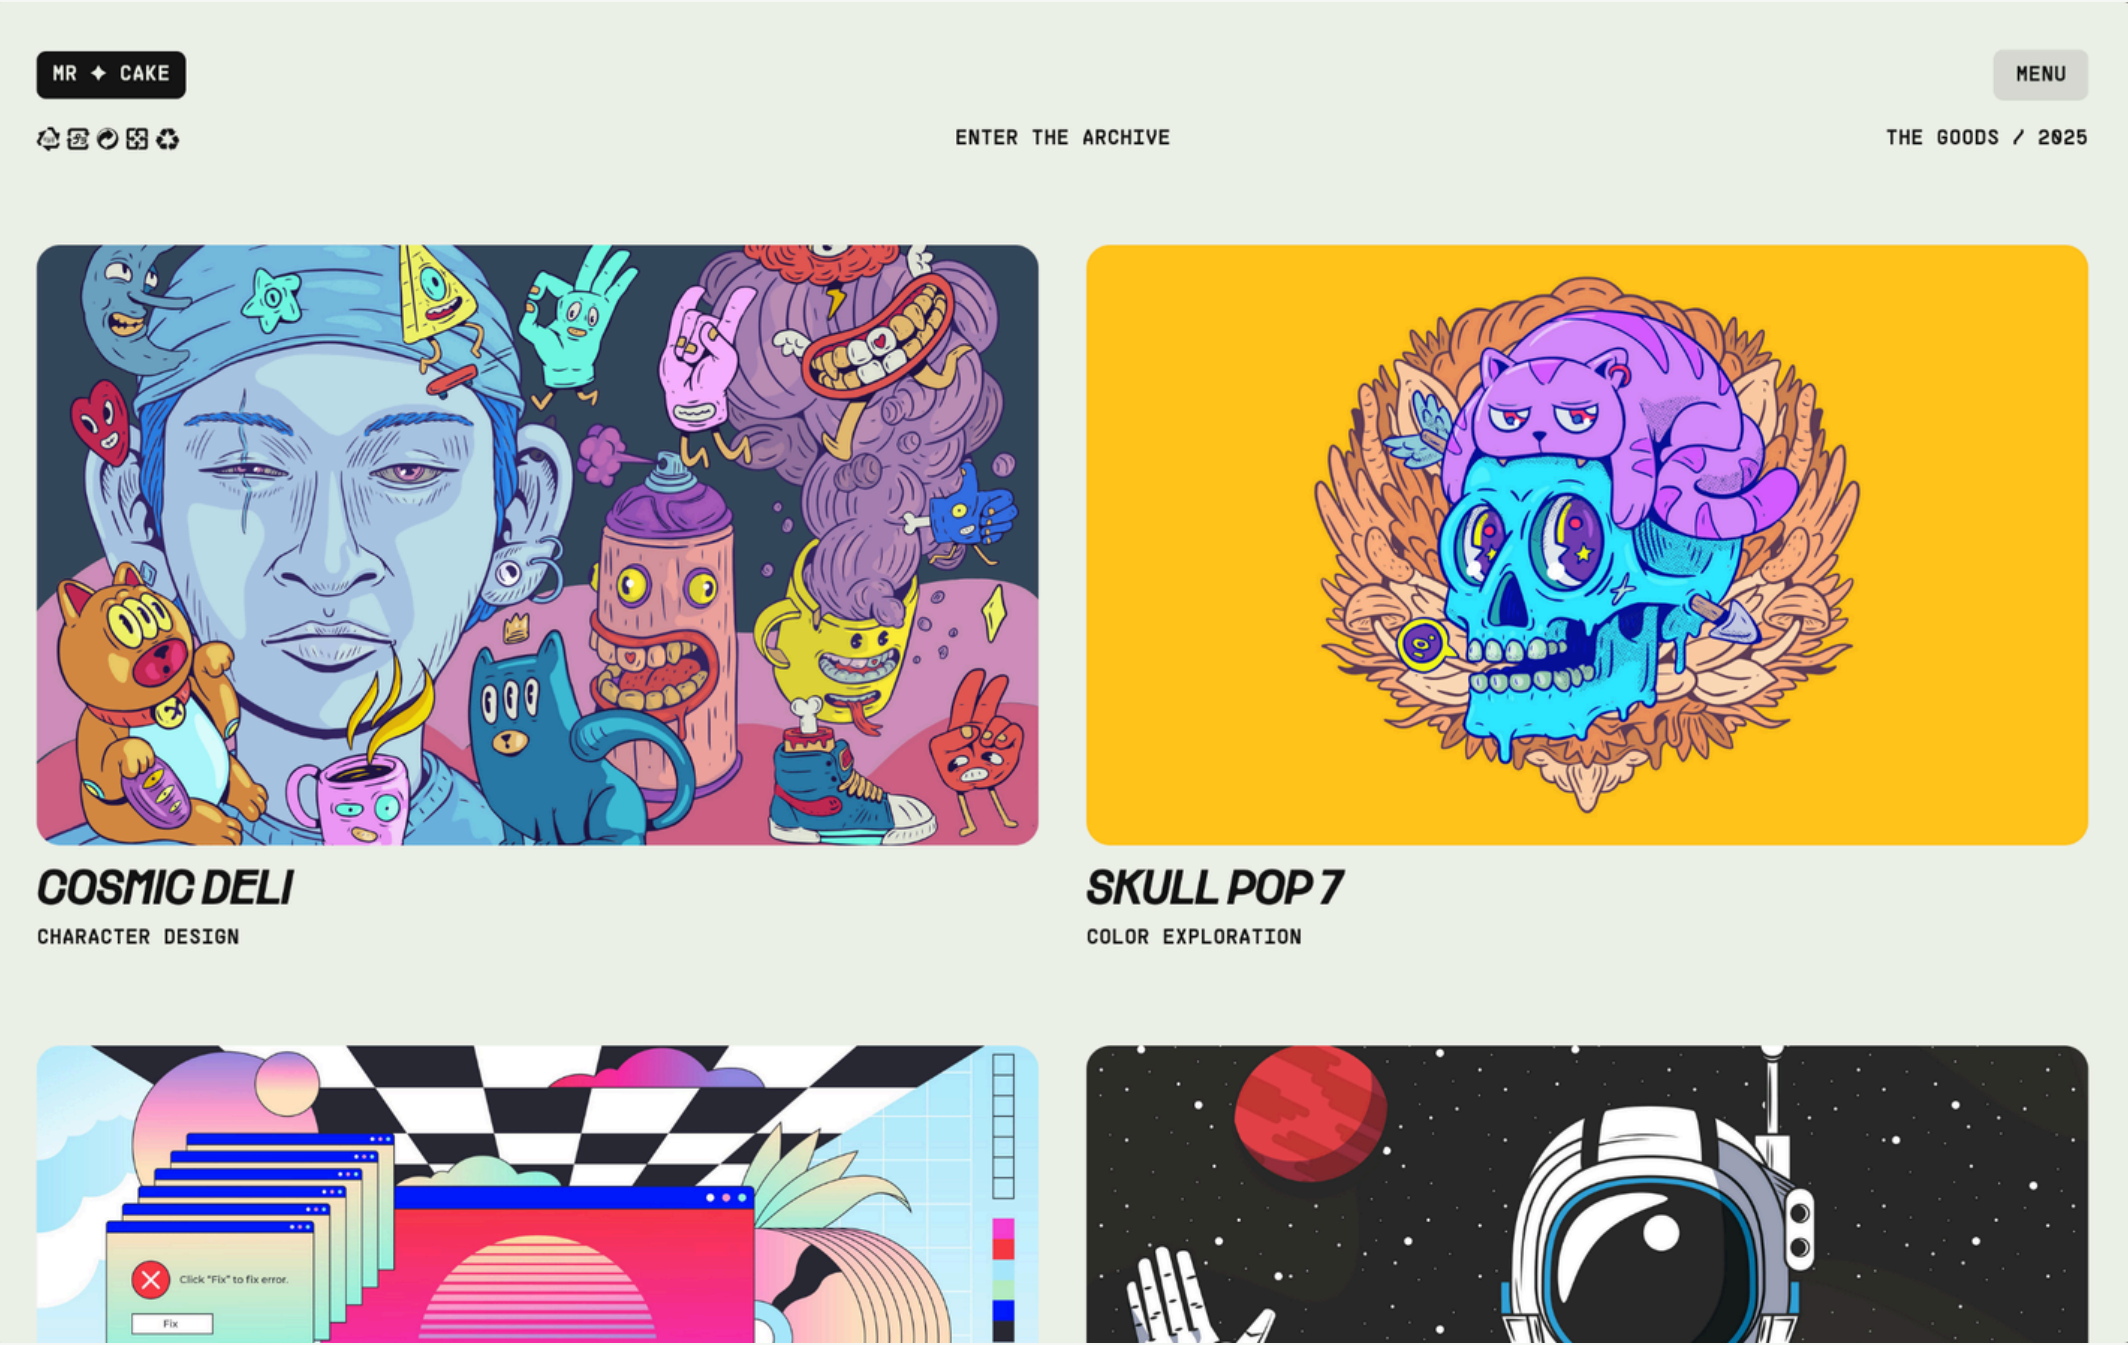

AI Web Development / website work	COMPLETED
Website research / improvement analysis	COMPLETED
Digital / social presence research	COMPLETED
Donation / fundraising activity	NOT COMPLETED

What the Internship Focused On

- Practical web development and interface composition
- Website improvement and UX-oriented analysis
- Digital presence research across social platforms
- Structured NGO website content: impact, campaigns, donation, volunteer and testimonials
- Documentation of work through screenshots and supporting internship records

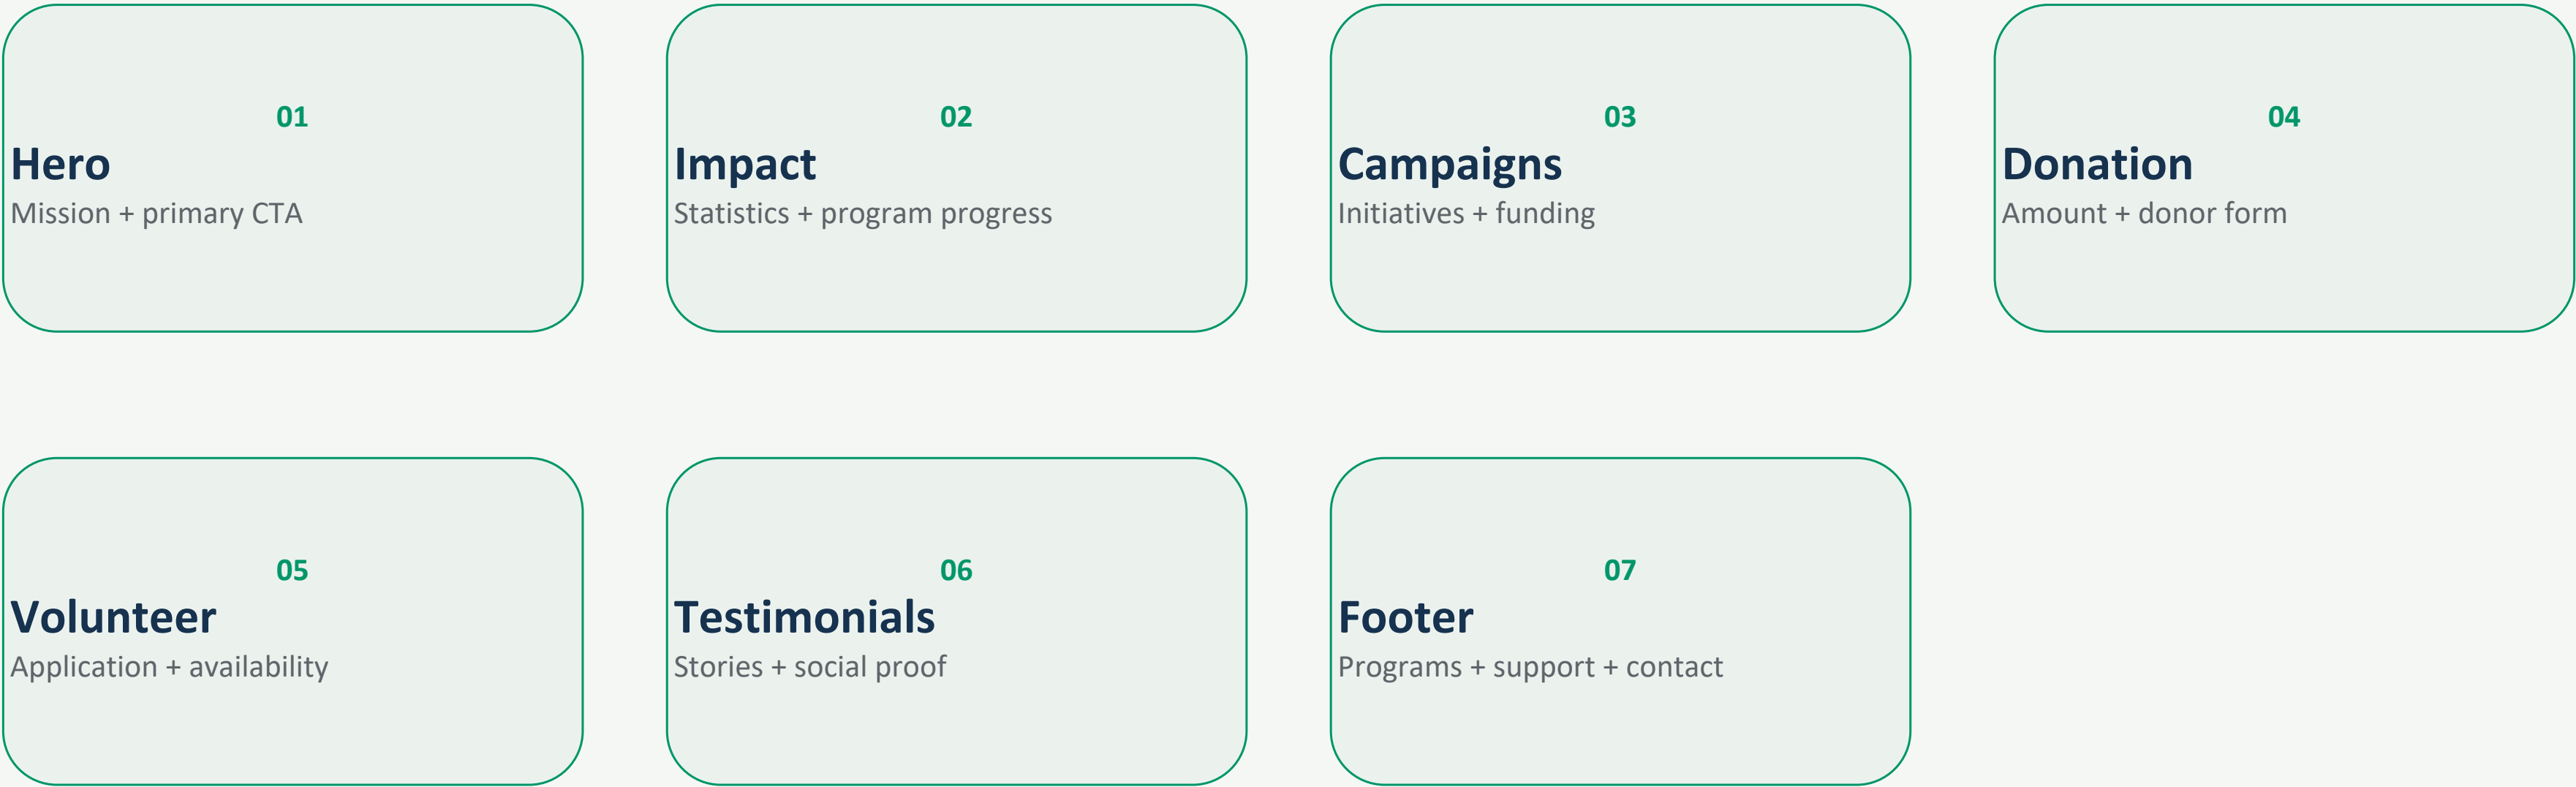

Project: HopeForward Website

Supplied project/prototype evidence

- Clear NGO-style hero and mission
- Impact statistics and progress
- Campaign cards with funding status
- Donation and volunteer conversion paths
- Testimonials and organization information

Website Information Architecture

UX Findings & Improvement Direction

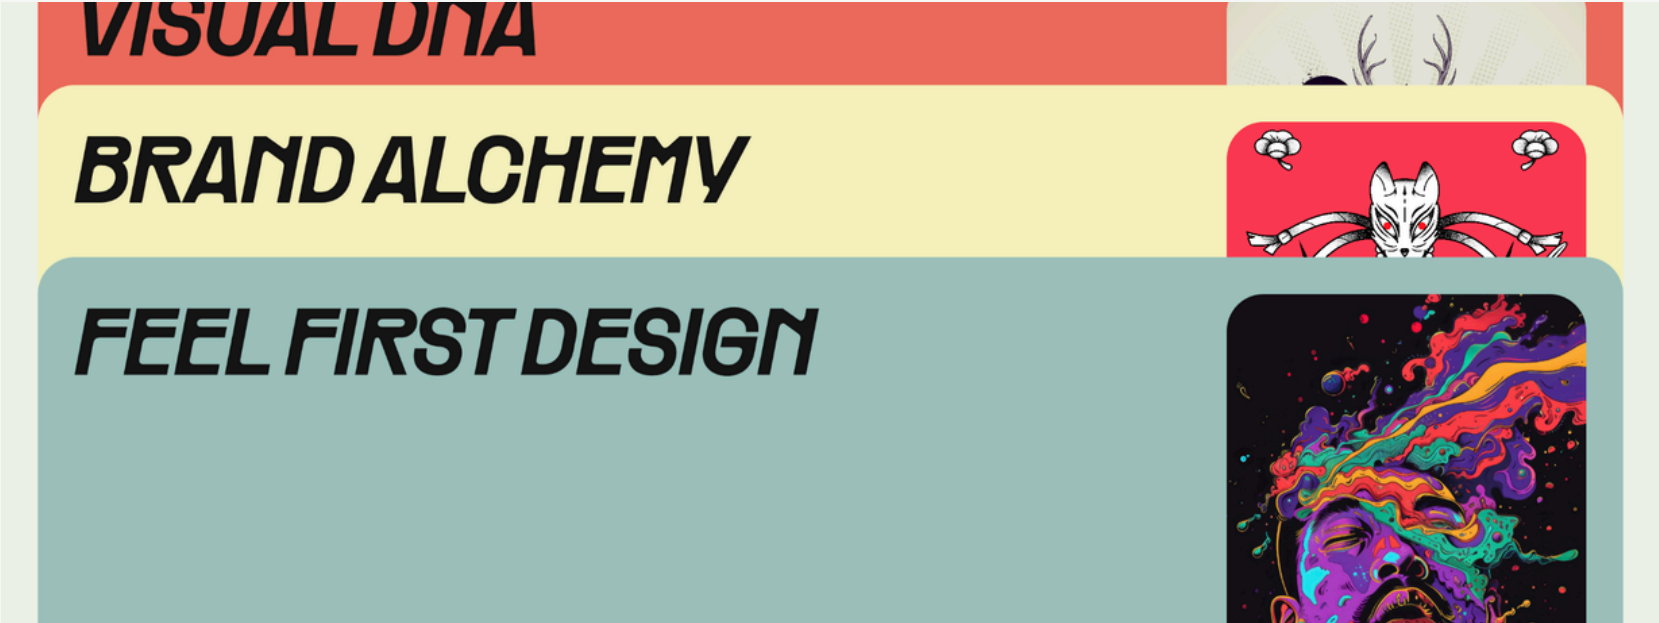

Based on the supplied InAmigos Foundation website analysis

- Homepage: stronger Donate Now / Volunteer CTAs and earlier impact figures
- Impact: animated counters, icons and growth context
- Causes: differentiated visuals, testimonials and success stories
- Volunteers & Events: richer profiles, registration, countdowns and galleries
- Contact: map, FAQs, WhatsApp option and response expectations
- Overall: sticky navigation, accessibility, mobile optimization, performance and donation visibility

Design Evidence

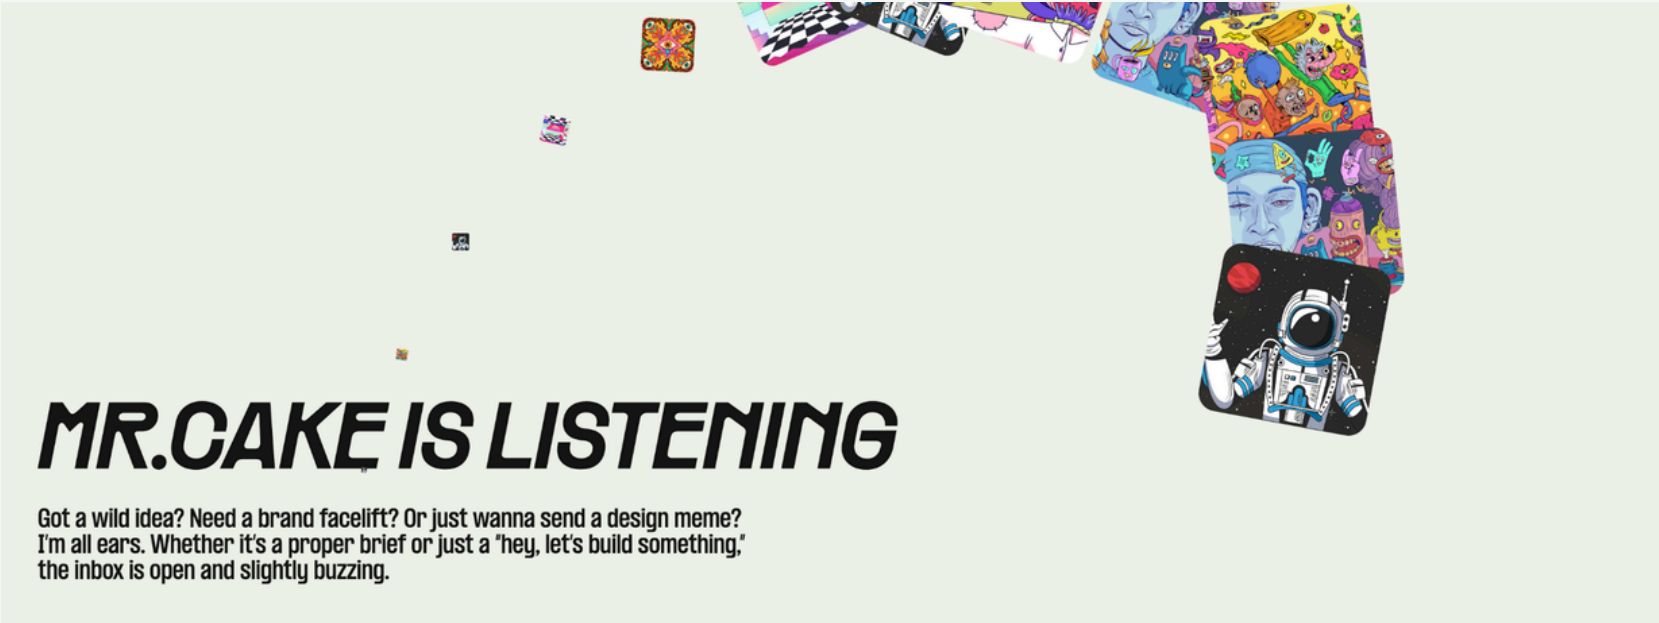

Landing / visual identity

Visual DNA

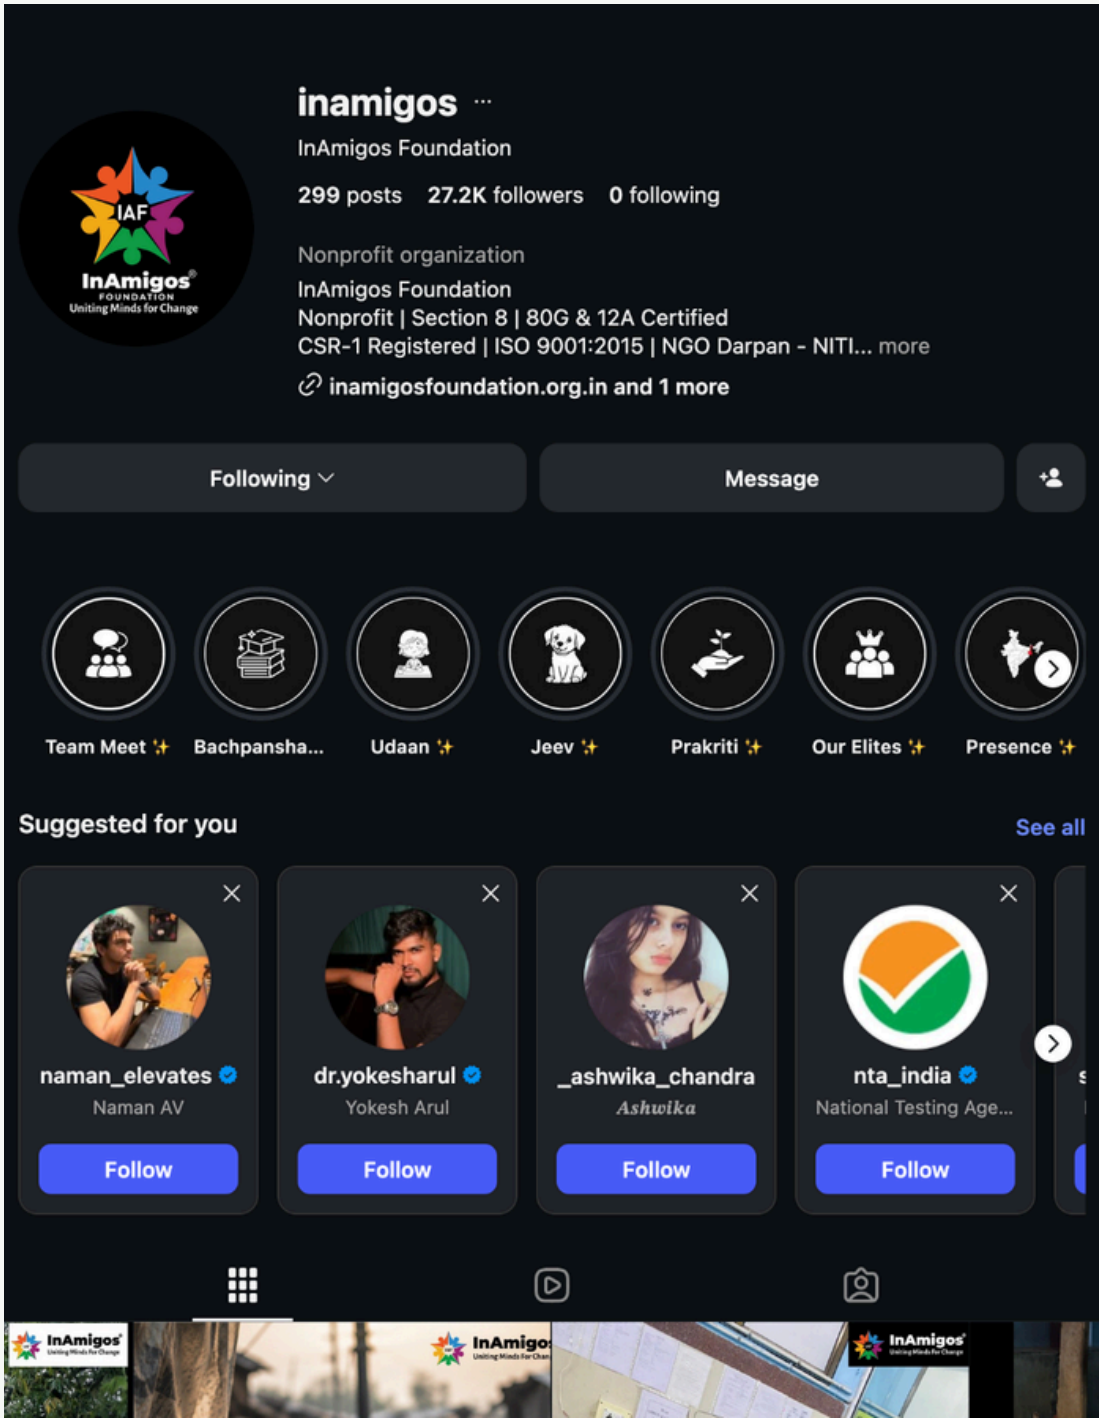

About / profile

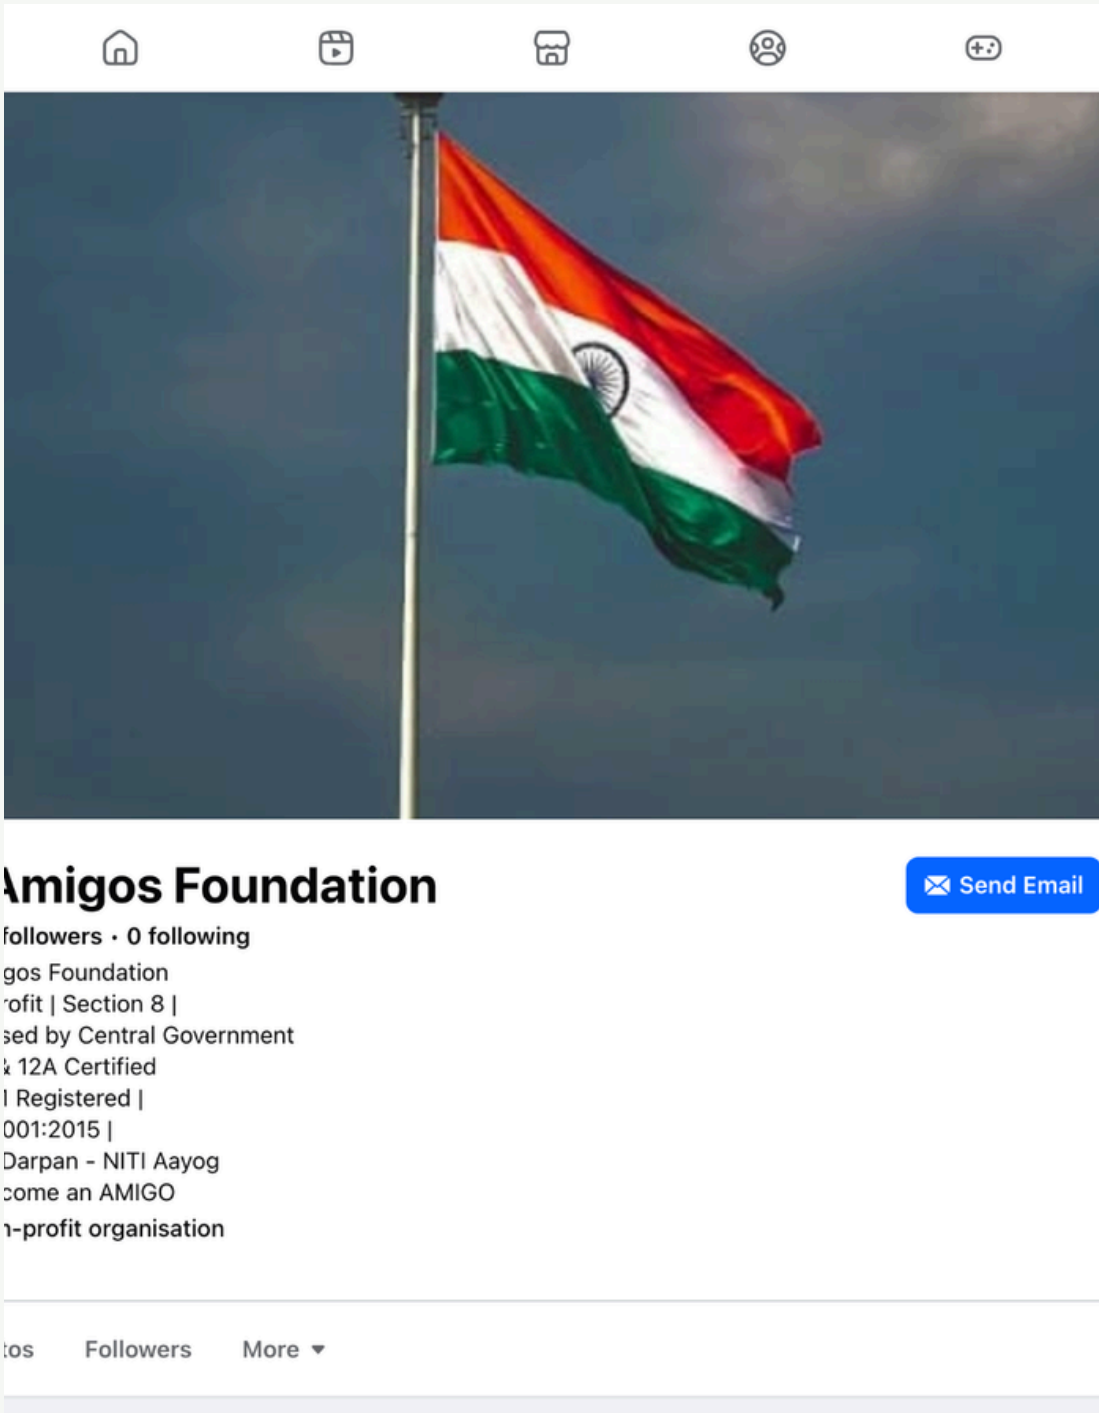

Contact

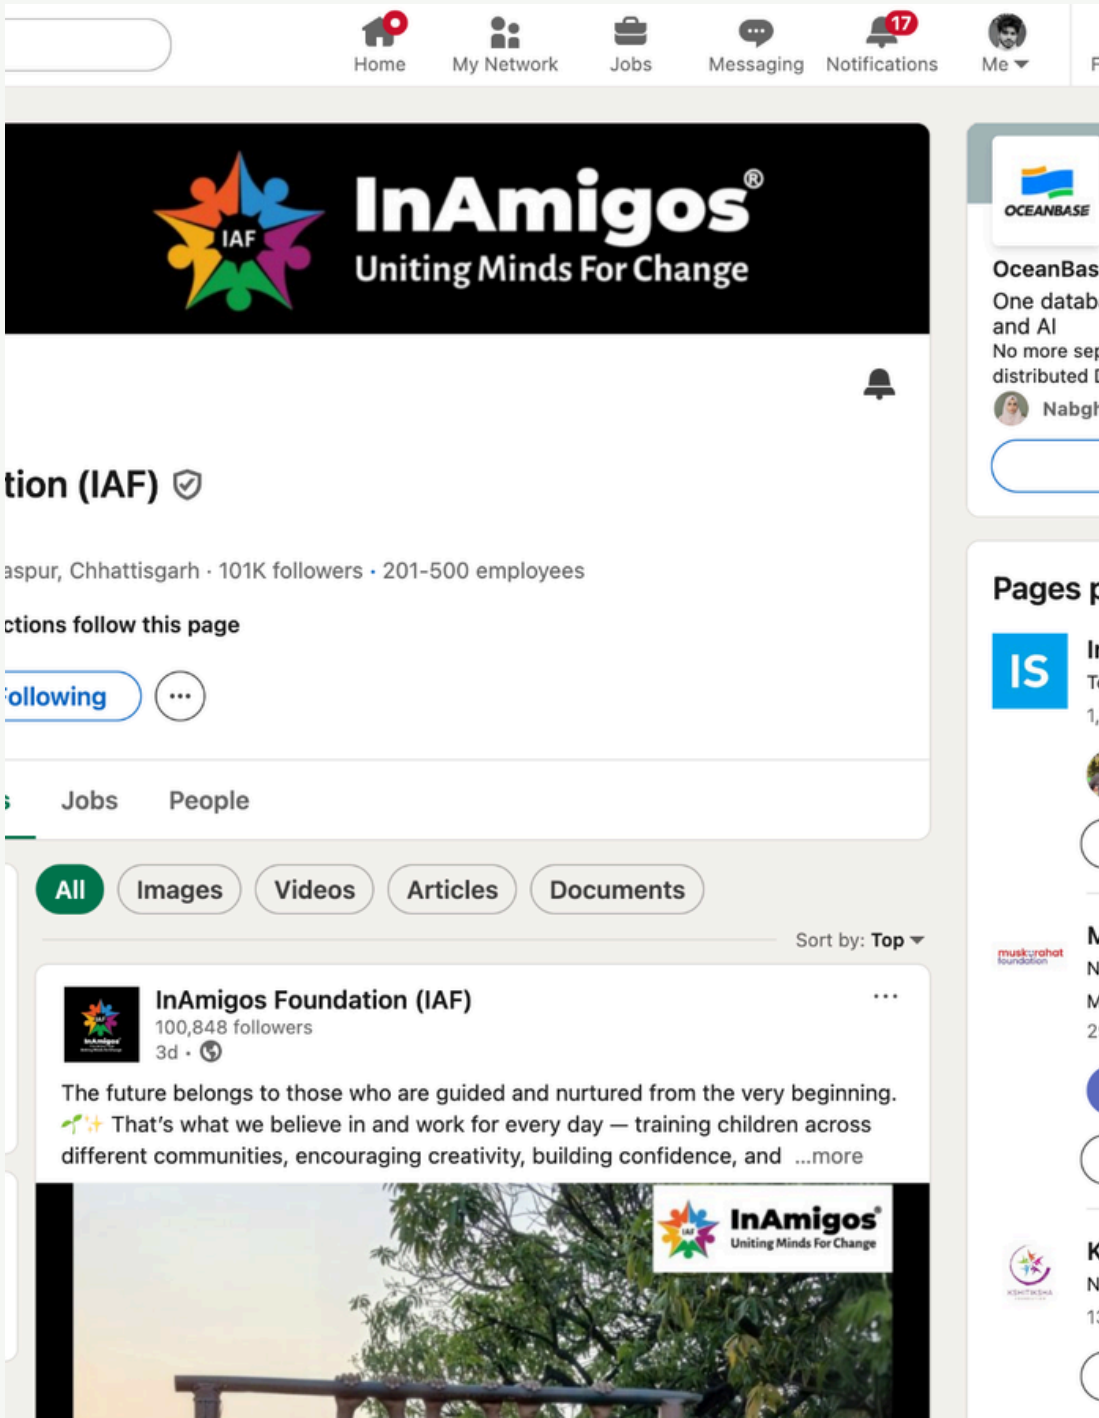

Digital Presence Evidence

Instagram

Facebook

LinkedIn

Key Learning Outcomes

- Translating organizational needs into page structure and UI
- Designing conversion paths around donation and volunteering
- Using visual hierarchy to make information scannable
- Building structured campaign, form, testimonial and statistics components
- Evaluating UX through accessibility, mobile, trust and performance lenses
- Documenting development work professionally

Challenges, Limitations & Accuracy

- Internship duration was short, so work required prioritization.
- Donation/fundraising activity was not completed and is not presented as completed.
- The report does not claim that the HopeForward prototype was deployed to InAmigos' production environment.
- Social-media numbers shown in screenshots are point-in-time evidence.
- All major claims in this presentation are grounded in the supplied internship documents and project evidence.

THANK YOU
